Attendance

Missing:

Calvin (reason: sleeping)

Kieran

Matters Arising

1. Zac looked into saving content when app is closed etc. He found there are set methods, and he was asked to display a small next week.
2. Carl looked into DBMS for android and server, android has it's own built-in SQL support, we found that there is an API that finds out if a data connection has been established or not.
3. HTTP posts implementation in PHP and Java were discussed using JRMI (Jason can be used in JAVA and PHP)

New business

1. Cormac brady was made group leader
2. A Facebook group was proposed for better communication
3. The group is now set on creating the project plan
